

DIAGNOSIS OF MODERNITY

The World-devouring **SOCIAL ANARCHY** does not have a customer, but it has two reasons:

- 1st Reason **The crash of COLLECTIVISM** as of the current world order ideology-monopoly. This is due to its objective incompatibility with Evolution itself, which is life on the edge and excludes excess a priori. Collectivism, on the contrary, is intended to dissolve this edge in excess.
- Thus, **ideological prostration, political hysteria, humanitarian psychoses** that take place in the United States, Europe, the Catholic Church are just products of this crash. The "oncology" behind all of this is a side effect of excessive collectivism – **the mental "obesity" of a person**.

*Practically, this is a new and already globally dominant social class, whose **social needs exceed its personal productivity**. Despite this defect, he associates himself with the primary source of power. And even trying to become that.*

- 2st Reason **The Acquired Ideological Deficiency Syndrome – AIDS** – is one of the worst side effects of collectivism, affects any all consciousness, whose material capabilities are excessive as compared with their intellectual and spiritual capabilities.

The state when **a person has more than he can** is the main catalyst for **the malignant monetization** of relations in particular, and the irreversible crisis of state institutions in general. As a result, in times when money "calls the shots":

the income becomes corrupt, the laws - subjective, the creativity - schismatic; the sentiments - anarchic; the intellectual and spiritual evolution - meaningless, the peaceful coexistence of worldviews - impossible.

TREATMENT or CORRECTION

The mental "obesity" degree of a man and the rate of collectivism crash allows to apply two solutions:

- 1st Solution **Ideological "Prosthesis"** allows **reformatting the crash of collectivism into its dismantling**. This will not change the fate of those who was fed by that, but it will make it less painful. Which will relieve humanitarian tension and give some time for a second solution.
- 2st Solution **Consensus Matrix** or Cohabitation Ideology of a Person, Religions, Nations, and Cultures. It is a radical prevention program of Acquired Ideological Deficiency Syndrome. Which is **a "deal" between "material and spiritual"**, in which the growth of one side is impossible without the growth of the other side.

Private LABORATORY for Ideological Safety

After thirty years of ideological selection, the causative agent of **the healthy domination - over oneself, and the pathological domination - over others**, was identified. This enables for:

- **multi-vector diagnostics of social anomalies;**
- **their correction or safe dismantling;**
- **mental "obesity" test.**
